Digital Video Player

The Aigo E858 is one of the smallest MP4 player on the market and is crammed with amazing features that allow watching movies and listening to music on the go, browsing pictures, reading text, storing data and voice recording. The E858 is neat, light and extremely easy to use as its ergonomic square shape allows it to be operated with one finger. Measuring only 66 x 66 x 19mm, the E858 fits in a 2" high definition colour screen for enjoying high quality images, which can also be viewed on TV or projector when connected through the AV output. The E858 supports most major video and audio formats and stores up to 8GB on flash memory. It can play 4 continuous hours of video and 5 hours of music, more than enough to entertain at home or on the move.

Watch movies on the go

Browse your favourite pictures and create slideshows

Easy to navigate graphical user interface

Watch movies from player on most TV sets

Record meetings and music with the built-in microphone
